TAFE's Tasmania Metals South Campus recognised for excellence in Metals & Engineering

TAFE Tasmania Metals South has been recognised as a leading registered training organisation with a Three Gold Star Rating for its metals and engineering courses.

The Star Rating Scheme is administered by The Institute for Trade Skills Excellence and recognises excellence in trade skills training among TAFE and Registered Training Organisations.

Malcolm White, CEO of TAFE Tasmania, said that receiving the Three Gold Star Rating was recognition of the high quality of teaching delivered.

"The Star Rating Scheme helps us ensure that our apprentices and trainees have the right skills to contribute to industry and the region's economy" said Mr White.

The Star Rating Scheme identifies the very best training providers, industry by industry, to enable employers, career counsellors, potential students, and parents to distinguish excellence in trade training by evaluating training providers.

Industry areas within Registered Training Organisations which apply receive either a: One Gold Star; Two Gold Star; or Three Gold Star Rating to indicate that they have achieved excellent results for their students.

The Star Rating Scheme focuses on the following eight areas of skill shortage:

- Automotive
- Building and Construction
- Electrical
- Hospitality and Personal Services
- Manufacturing
- Metals and Engineering
- Mineral Resources
- Rural and Farming

Evaluations are carried out against three broad criteria that were developed in partnership with the industry.

The evaluation process includes an initial self evaluation by the relevant faculty or school, followed by a site visit to schools or faculties who demonstrate potential to achieve a One Gold Star, Two Gold Star or Three Gold Star rating.

Brian Wexham, Chief Executive Officer of The Institute for Trade Skills Excellence said that the Star Rating Scheme reassures students that they are selecting the most appropriate course.

“One of the biggest concerns when choosing a course is whether or not it will get people the job they want when they complete the course. Thanks to the Star Ratings Scheme, prospective students and employers now have a credible source to validate a course.

“The Scheme aims to recognise high performing registered training providers such as TAFE Tasmania Metals South, and help individual schools and faculties understand exactly what their clients want from their training.

“The Star Rating Scheme is an industry driven initiative and has been developed by The Institute and industry to provide a platform that will deliver the vocational training outcomes required to meet industry needs” said Mr Wexham.

Malcolm White, CEO of TAFE Tasmania Metals South, said the training organisation views the Star Rating Scheme as an effective way of addressing Australia’s skills shortage.

“The three Gold Star rating follows rigorous assessment by the Institute for Trade Skills Excellence and firmly places TAFE Tasmania’s Metals and Trades team equal to any in Australia, reinforcing the importance of working with employees and industry”, said Mr White.
